

Final Exam
FCOM001: BASIC INFORMATION TECHNOLOGY
Fall-T1 2024

Points of attention:

- For each question, the maximum earned points are mentioned between brackets at the end of each question.
- Make sure your answers are written to the point.
- All answers must be written in English.
- When finished, submit your exam on the Blackboard.
- Any cheating/copying will result in failing the examination
- Any cheating/copying may result in an instant failing of the examination.

Exam Duration: 2 hours
Instructor's Name: Mitha Al-Khazimi
Exam Date: 29/11/2024
Program: FND

Question 1**[30 Marks]****Circle the correct answer.**

1. _____ file is created when working with an application.

- a. Executive
- b. Data
- c. Application
- d. System

2. Identify the device shown in the image and its primary function.

(Morrison, 2015)

- a. External hard drive; used to expand storage capacity
- b. Printer; used to print documents
- c. Wi-Fi router; used to improve internet connection
- d. USB hub; used to add more USB port

3. The default view for any folder in the pictures library is _____ view.

- a. Large icons
- b. Thumbnail
- c. Details
- d. Tile

4. An / A _____ provides a quick way to perform an action such as opening a folder or a file.

- a. pin
- b. arrow icon
- c. tile
- d. shortcut

5. A term refers to a disk that is installed in the system unit.
- a. removable disk
 - b. drive
 - c. subfolder
 - d. hard disc
6. A _____ is a notation indicating where a file is located on your computer.
- a. file extension
 - b. file name
 - c. file path
 - d. file format
7. The primary function of a computer is _____.
- a. to play games
 - b. to store data
 - c. to process information
 - d. to browse the internet
8. _____ is used to connect a wireless mouse to a laptop computer.
- a. Cable
 - b. Expansion card
 - c. Stylus
 - d. USB adapter
9. _____ uses flash memory technology to store data as electrical rather than magnetic charges.
- a. Optical drive
 - b. Blu-ray disc
 - c. Solid-state drive
 - d. Mechanical hard drive

10. Which of the following pointing devices is best suited for users with limited desk space?
- a. trackball
 - b. digital pen
 - c. optical mouse
 - d. scanner
11. A screen that manipulates light within a layer of liquid crystal cells to produce an image.
- a. USB
 - b. LCD
 - c. RFID
 - d. LED
12. The smallest types of removable media are called _____.
- a. express cards
 - b. memory cards
 - c. CD-RS modules
 - d. adapter cards
13. _____ is an example of application software.
- a. Operating system
 - b. Utility software
 - c. Web browser
 - d. Server operating system
14. Data can be transformed into information _____.
- a. by collecting more data from various sources
 - b. by organizing, analyzing, and interpreting the data
 - c. by generating reports based on raw data
 - d. by digitizing physical records into a database
15. Which type of operating system is specifically designed for handheld devices like smartphones and tablets?
- A. Personal computer
 - B. Operating systems
 - C. Mobile computing operating systems
 - D. Server operating system

16. The purpose of file management in an operating system is _____.

- a. running multiple applications simultaneously
- b. providing network services to other computers
- c. storing and organizing files and directories
- d. optimizing CPU and memory usage

17. What is the role of device management in an operating system?

- a. Runs multiple tasks simultaneously
- b. Manages and controls hardware devices
- c. Provides network services to other computers
- d. Creates and edits electronic content

18. The function of RAM in a computer is _____.

- a. to store data for a long time
- b. to manage computer resources and activities
- c. to provide temporary storage for running programs
- d. to control the hardware devices connected to a computer

19. RJ-45 is commonly referred to as _____.

- a. Ethernet port
- b. USB port
- c. HDMI port
- d. Serial port

20. The purpose of a LAN (Local Area Network) is _____.

- a. to connect multiple computers within a limited area
- b. to connect computers to the internet
- c. to establish wireless connections
- d. to transfer data between peripheral devices

21. The speed of a processor is measured in terms of _____.

- a. memory capacity
- b. cycles per second or frequency
- c. the number of peripheral devices attached
- d. bits and bytes

22. _____ is the smallest unit of data in a computer's memory.
- a. Bit
 - b. Byte
 - c. Hertz
 - d. Gigahertz
23. There is a single computer chip that contains all the electronic circuitry for performing a personal computer's processing tasks.
- a. RAM
 - b. OSU
 - c. CPU
 - d. ROM
24. What is the correct difference between an internal hard disk drive and an external hard disk drive?
- a. Internal hard disk drives are removable, while external ones are not.
 - b. Internal hard disk drives have read/write heads, while external ones do not.
 - c. Internal hard disk drives are faster than external ones.
 - d. Internal hard disk drives are permanently attached to the computer, while external ones can be disconnected.
25. Which category do popular operating systems like iOS, Android, Windows Phone, and Windows RT fall under?
- a. Personal
 - b. Mobile
 - c. Server
 - d. Network
26. In a computer system, what term is used to describe any component needed by the system to perform tasks?
- a. User Interface
 - b. Resource
 - c. Utility Program
 - d. Platform

27. Which operating system allows you to work with more than one program at the same time?

- a. multitasking
- b. single-tasking
- c. real-time
- d. batch

28. _____ is a way to turn off a computer session.

- a. Signing out
- b. Locking
- c. Shutting down
- d. Restarting

29. When data is processed into a meaningful form, it becomes _____.

- a. information
- b. storage
- c. input
- d. memory

30. _____ accepts and carries out instructions from software.

- a. Motherboard
- b. Buffer
- c. Device drivers
- d. Processor

Question 2

[10 Marks]

1. Drag and drop the labels to their correct positions on the computer motherboard shown in the image below.

(Morrison, 2015)

CPU	Fan	ROM chip	Heat sink	RAM board	Motherboard
-----	-----	----------	-----------	-----------	-------------

2. Drag and drop the steps of the computer boot process in the correct order based on the diagram below.

(Morrison, 2015)
