14. What is the difference between a 32-bit and a 64-bit CPU?
- a. A 32-bit CPU can only work with up to 2GB of RAM, while a 64-bit CPU can work with an almost unlimited amount of RAM.
 - b. A 32-bit CPU is faster than a 64-bit CPU.
 - c. A 64-bit CPU is more efficient than a 32-bit CPU.
 - d. A 64-bit CPU is slower than a 32-bit CPU.
15. What is the difference between a hard drive and a solid state 'SSD' drive?
- a. A hard drive is faster than a solid-state drive.
 - b. A solid-state drive is faster than a hard drive.
 - c. There is no difference between a hard drive and a solid-state drive.
 - d. There are similarities between a hard drive and a solid-state drive.
16. Which type of CPU can work with an almost unlimited amount of RAM?
- a. 16-bit CPU.
 - b. 32-bit CPU.
 - c. 64-bit CPU.
 - d. 128-bit CPU.
17. Which is considered as personal data?
- a. Data that is publicly available.
 - b. Data that is shared with friends and family.
 - c. Data that identifies an individual.
 - d. Data that is stored on personal devices.
18. Which of the following is a part of data protection?
- a. Using complex passwords
 - b. Sharing data with multiple users
 - c. Deleting unnecessary data
 - d. Increasing data storage capacity

19. A trademark is primarily used for _____.
a. protecting inventions
b. protecting industrial designs
c. identifying the source of goods or services
d. protecting creative expressions
20. What method is used in installing software?
a. CD/DVD.
b. Website.
c. App store.
d. All the options given.
21. If your computer doesn't start properly when you turn it on or restart it, which mode can you try to fix or troubleshoot the problem?
a. Recovery mode.
b. Safe mode.
c. Compatibility mode.
d. Troubleshooting mode.
22. A/An _____ is a boost to the electrical charge that powers a computer and can damage internal system components.
a. power surge
b. energy surge
c. wizard
d. thread
23. During installation, you are often given the choice to select the _____ folder where the program will be installed.
a. Download
b. Desktop
c. Program Files
d. Documents
24. What is Ergonomics?
a. The study of human interactions with computers and software.
b. The design of workplaces and tools to fit the needs of the human body.
c. The study of environmental factors affecting human health.
d. The development of fitness programs for improving physical health.

25. The two types of software licenses are _____.
a. Single-user license and open-source license
b. Site license and free license
c. Proprietary license and open-source license
d. Single-user license and site license

a. Below eye level.
b. At eye level.
c. Above eye level.
d. Tilted sideways.
28. Which component is most critical for a user who needs a computer for gaming or video editing?
a. large monitor.
b. High-end graphics card (GPU).
c. Extra USB ports.
d. Built-in webcam.
29. _____ unit is used to measure the processing speed of a computer.
a. Gigabytes (GB)
b. Megahertz (MHz)
c. Terabytes (TB)
d. Milliseconds (ms)
30. Which of these protects original creative works (e.g., books, music, or movies)?
a. Trademark.
b. Copyright.
c. Patent.
d. Industrial Design.

Question2.**[10 Marks]****1. List the correct steps to install a program:****(5 Marks)**

2. Accept the software license agreement
3. Launch the installer file
4. Choose the installation location
5. Download the program's setup file from a trusted source
6. Select any additional options or features to install
7. Follow the on-screen instructions to complete the installation
8. Verify the program's installation by opening it

2. Match the terms in Column A with the correct descriptions in Column B by writing the appropriate letter (a-e) in column C.**(5 Marks)**

Column A (Terms)	Column B (Descriptions)	Column C (Answers)
1. Full System	a. Refers to analyzing changes or variations within a specific portion of the system	
2. Differential	b. A step-by-step method of adding updates or improvements without affecting the entire system.	
3. Incremental	c. The process of combining all parts of the system into a cohesive whole	
4. Integration Process	d. Represents the entire framework or structure under consideration	
5. Error Adjustment	e. A method used to correct minor discrepancies during the process
